**WILLIAM M. TREAT
PRIMARY EXAMINER**

The following is an examiner's statement of reasons for allowance: Independent claims 1, 18, and 22 and their dependent claims are allowable over the prior art of record based on the claim language, "scheduling logic that schedules execution of the instruction contexts based on condition signals indicating an availability of a hardware resource, with the condition signals being divided into groups of condition signals, which are sampled in turn by the scheduling logic to provide a plurality of scan sets of sampled conditions", recited in claim 1 and similar language in the other independent claims. While the International Search Report indicated that the EPO examiner thought Anderson *et al.* (Patent No. 6,092,180) met the limitations of claims 1, 2, 18, and 22, this examiner views the language, "scheduling logic that schedules execution of the instruction contexts based on condition signals indicating an availability of a hardware resource", in independent claim 1 and similar language in independent claims 18 and 22 as requiring that the scheduling determination be based on condition signals indicating a run-time availability of the hardware resource. In other words, applicant's system is a dynamic scheduling system based on run-time parameters while Anderson's system is a static scheduling system based on historical indications of the availability of a hardware resource for a given instruction.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to William M. Treat at telephone number (571) 272-4175. The examiner works at home on Wednesdays but may normally be reached on Wednesdays by leaving a voice message using his office phone number.
